

Profile

Ever since I wrote my first line of code, I've been fascinated by how a few keystrokes can turn an idea into something people can actually use. That curiosity turned into a passion and eventually into a career as a professional developer. In production, I ship stable, secure and scalable products with clean code and SEO best practices, focused on Full-Stack Development (PHP, Laravel, MySQL), Mobile Apps (Flutter, Firebase) while continuously learning React.js, Node.js and Python.
